

Services for RUCKUS Edge™

Offered by RUCKUS Professional Services

RUCKUS Edge

THE KEY TO SUCCESSFUL RUCKUS EDGE INTEGRATION

RUCKUS Edge is a Wi-Fi® gateway managed under the single pane of glass view in RUCKUS One (R1) for multi-use/multi-location networks. The most efficient and thorough way to integrate RUCKUS Edge is by enlisting RUCKUS Professional Services to oversee the product and its best-practice configuration are in production on time and delivering the services needed for your environment.

BENEFITS OF WORKING WITH RUCKUS PROFESSIONAL SERVICES

Accelerated Solution Deployment:

- **Benefit:** Speed up project timelines with expert assistance, allowing you to deliver network solutions to your clients faster, meeting deadlines and reducing time to market.

Optimized Product Integration:

- **Benefit:** Optimize performance with tailored design and configuration services, allowing you to deploy RUCKUS Edge solutions that perfectly meet the unique needs of each environment.

Scalable and Future-Proof Solutions:

- **Benefit:** Design networks that easily scale to meet future growth and evolving business demands, enhancing long-term customer satisfaction and reducing the need for frequent upgrades.

Improved Client Satisfaction:

- **Benefit:** Deliver seamless, secure, and high-performance networks that enhance the end-user experience, helping you build stronger relationships with your customers and encouraging repeat business.

OPTIMIZING WIRELESS CONNECTIVITY WITH RUCKUS EDGE

Success Assurance when Integrating RUCKUS Edge

RUCKUS Professional Services specializes in the design and integration of networks for global enterprises, MDUs, manufacturing, and warehousing facilities using RUCKUS® products. Our engineers bring unmatched expertise in end-to-end technologies and best practices to your projects. Whether you're deploying RUCKUS Edge to streamline data traffic and secure connections or integrating complex networks, RUCKUS Professional Services optimizes an optimal deployment, tailored to meet your organization's unique needs.

RUCKUS Professional Services focus on RUCKUS Edge Features:

- **Flexible Traffic Redirection:** Redirect traffic securely between remote and local data centers with minimal operational complexity.
- **Secure Tunneled WLANs:** Enable secure, encrypted wireless LAN connections, facilitating compliance and data protection.
- **High-Speed Packet Processing:** Improve throughput with forwarding rates of 1 Gbps, 10 Gbps, or higher.
- **Centralized Control:** Manage and control your network traffic seamlessly through the RUCKUS One® platform, enhancing scalability and flexibility.
- **Simple Network Management:** Offload services such as DHCP/NAT to eliminate extraneous appliances, lowering costs and operational burden.
- **Layer 3 Roaming:** Enable roaming across distributed RUCKUS SmartZone™ Data Planes without the need for mobility controllers.
- **Support for Lawful Intercept:** Aligned with CALEA standards by enabling lawful intercept of encrypted traffic.
- **Optimized Quality of Experience (QoE):** RUCKUS Edge improves end-user satisfaction, safeguards performance, and lowers operational expenses.

Improve Design & Deployment Efficiency for your entire network

- Collaborate with engineers in possession of substantial real-world experience relating to the design and deployment of unique or complex, high availability RF networks
- Apply both creative and best practices to the survey and design of unique network solutions

- Engage deployment and testing standards to enhance optimized performance
- Make use of a consistent and well-tested solution delivery program
- Enable on-time delivery by utilizing experts with the right skills and experience to deliver properly commissioned and documented solutions
- Facilitate the transformation to a dynamic, next-generation RF network infrastructure to meet current and future business requirements
- Accelerate deployment of network-based applications and technologies to increase productivity
- Benefit from a single vendor for best-in-class RUCKUS Wi-Fi, IoT, ICX® LAN and Edge

SKU	Description
905-PRO1-REDGE01	PS: RUCKUS Pro Services remote setup and initial configuration of a single instance of RUCKUS Edge for a single site. This includes R1 architecture planning, virtual or appliance configuration, integration with the network controller, and performing functional tests to enable proper operation. This service is performed remotely.

MAXIMIZING INVESTMENTS

To help optimize technology investments, RUCKUS and its partners provide complete solutions that include education, support, and services tailored to the needs of the hospitality sector.
